

## *Ancient North America Fourth Edition*

What did California look like before Hollywood? Before the Gold Rush? Before the missions? Brian Fagan, the best known popular archaeology writer in America, is your tour guide on a fascinating trip across the Golden State before the arrival of Europeans. Fagan tells of the first groups who drifted into the state over 13,000 years ago and how their descendants used the land and sea to survive in a fragile environment subject to earthquake, drought, and flood. On your tour, you will visit the shellmounds of San Francisco Bay, salmon trappers of the northern streams, acorn gatherers of the Central Valley, Chumash villages on the Santa Barbara coast, and shamans who painted mysterious figures on stone. Fagan shows how archaeologists scientifically reconstruct this lost history from fragments of bone, shell, and stone, from travellers' and scholars' descriptions of vanished peoples, and from the stories told by the tribal members themselves. Join a famous archaeologist on this captivating journey and find out what important lessons this story has for California's future.

Archaeologists, ethnohistorians, osteologists, and cultural anthropologists have only recently begun to address seriously the issue of Native American war and peace in the eastern United States. New methods for identifying prehistoric cooperation and conflict in the archaeological record are now helping to advance our knowledge of their existence and importance. Focusing on four major issues in prehistoric warfare studies—settlement patterns, skeletal trauma, weaponry, and iconography—David H. Dye presents a new interpretation of ancient war and peace east of the Mississippi. He considers evidence for raiding and more organized forms of warfare, accounts of native warfare witnessed by sixteenth-century Europeans, and the various causes of warfare, such as revenge, competition for resources, and ideology. *War Paths, Peace Paths* offers an innovative analysis of cooperation and conflict in the prehistoric eastern United States.

"the first book in twenty years to gather together a comprehensive prehistoric record *Light from Ancient Campfires* is the first book in twenty years to gather together a comprehensive archaeological record of the Northern Plains First Nations. Beginning with the earliest material traces of a human presence in Alberta, author Trevor Peck embarks on a monumental and detailed study of the physical evidence left behind by the area's original inhabitants. It is through the careful interpretation of these material remains that we are able to glean knowledge of the region's prehistoric cultures and of early Native lifeways. In the course of his survey, Peck accordingly reviews the shifting interpretations of the archaeological record that have emerged over the past two decades, asking how new information has altered our understanding of what allows us to identify and define a distinct culture.

### Publisher Description

This vital addition to the Routledge History of Economic Thought series surveys arguably the most important country in the development of economics as we know it today – the United States of America. *A History of American Economic Thought* is a comprehensive study of American economics as it has evolved over time, with several singularly unique features including: a thorough examination of the economics of American aboriginals prior to 1492; a detailed discussion of American economics as it has developed during the last fifty years; and a generous dose of non-mainstream American economics under the rubrics "Other Voices" and "Crosscurrents." It is far from being a native American community, and numerous social reformers and those with alternative points of view are given as much weight as the established figures who dominate the mainstream of the profession. Generous doses of American economic history are presented where appropriate to give context to the story of American economics as it proceeds through the ages, from seventeenth-century pre-independence into the twentieth-first century packed full of influential figures including John Bates Clark, Thorstein Veblen, Irving Fisher, Paul Samuelson, and John Kenneth Galbraith, to name but a few. This volume has something for everyone interested in the history of economic thought, the nexus of American economic thought and American economic history, the fusion of American economics and philosophy, and the history of science.

First Published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

In a new, updated edition, this comprehensive guide offers full coverage of both sides of the Tennessee–North Carolina divide. In a new, updated edition, this comprehensive guide offers full coverage of both sides of the Tennessee–North Carolina divide. Spend some time in the woods in two of the most popular national parks in the country—Great Smoky Mountains National Park and the Blue Ridge Parkway. You'll find the best scenic drives, boating, horseback riding, fishing, rock climbing, skiing, and golf, and great local produce, crafts, music, historic homes, and museums in brick-fronted downtowns and bucolic artists' colonies.

Since its inception in 1933, the Tennessee Valley Authority has played a dual role as federal agency and steward of the Tennessee River Valley. While known to most people today as an energy provider, the agency is also charged with managing and protecting the nation's fifth-largest river system, the Tennessee River, and vast tracts of land and resources encompassing Tennessee and portions of Alabama, Georgia, Kentucky, Mississippi, North Carolina, and Virginia. Included in TVA's mandate is the preservation of the archaeological record of the valley's prehistoric peoples—a record that would have been forever lost beneath floodwaters had TVA not demonstrated a commitment to minimize its impact on the valley and sought to protect its archaeological resources. In *TVA Archaeology*, fourteen contributors who have worked with TVA in its conservation effort discuss prehistoric excavations conducted at Tellico, Normandy, Jonathan's Creek, and many other sites. They explore TVA's role in the excavations and how the agency facilitated prehistoric investigations along proposed dam sites. They also delve into the history of TVA as it grew from a New Deal program to a federal corporation and reveal

how, during the agency's formative years, the TVA board responded to prodding from archaeologists David DeJarnette and William Webb and molded TVA into the steward of a region it is today. TVA remains a mainstay of progress and conservation within an important region of the United States, and its safeguarding of the valley's prehistory cements its legacy as more than just an energy supplier. Students and researchers interested in prehistoric archaeology, the Tennessee Valley, and the history of TVA will find this volume an invaluable contribution to the study of the region. Erin E. Pritchard is an archaeologist with the Tennessee Valley Authority. Her work includes multiple archaeological site investigations, most notably Dust Cave in northern Alabama, and she has authored and coauthored numerous site reports for TVA. Since 1976 newcomers and natives alike have learned about the rich history of the magnificent place they call home from *Colorado: A History of the Centennial State*. In this revised edition, co-authors Carl Abbott, Stephen J. Leonard, and Thomas J. Noel incorporate more than a decade of new events, findings, and insights about Colorado in an accessible volume that general readers and students will enjoy. The fourth edition tells of conflicts, new alliances, and changing ways of life as Hispanic, European, and African American settlers flooded into a region that was already home to Native Americans. Providing balanced coverage of the entire state's history - from Grand Junction to Lamar and from Trinidad to Craig - the authors also reveal how Denver and its surrounding communities developed and gained influence. While continuing to elucidate the significant impact of mining, agriculture, manufacturing, and tourism on Colorado, this edition broadens its coverage. The authors expand their discussion of the twentieth century with several new chapters on the economy, politics, and cultural conflicts of recent years. In addition, they address changes in attitudes toward the natural environment as well as the contributions of women, Hispanics, African Americans, and Asian Americans to the state. Dozens of new illustrations, updated statistics, and an extensive bibliography of the most recent research on Colorado history enhance this edition. This volume explores how pluralistic communities thrived in California's mining hinterland as well as how immigrants and California Natives mobilized and mitigated power inequalities through their daily experiences of identity expression, community cohesion, and labor relations.

***The world's bestselling introductory Latin course. Developed by the University of Cambridge School Classics Project, this bestselling Latin program provides an enjoyable and carefully paced introduction to the Latin language, complemented by background information on Roman culture and civilization. Starting in Roman Britain and moving on to imperial Rome itself, Unit 3 focuses on the murderous schemes and machinations of Gaius Salvius Liberalis, as he plots his ruthless and apparently unstoppable rise to power.***

***In the latest edition of their popular overview text, Erickson and Murphy continue to provide a comprehensive, affordable, and accessible introduction to anthropological theory from antiquity to the present. A new section on twenty-first-century anthropological theory has been added, with more coverage given to postcolonialism, non-Western anthropology, and public anthropology. The book has also been redesigned to be more visually and pedagogically engaging. Used on its own, or paired with the companion volume *Readings for a History of Anthropological Theory, Fourth Edition*, this reader offers a flexible and highly useful resource for the undergraduate anthropology classroom. For additional resources, visit the "Teaching Theory" page at [www.utpteachingculture.com](http://www.utpteachingculture.com).***

***Plains Societies and Cultures Indians of the Great Plains, written by Daniel J. Gelo of The University of Texas at San Antonio, is a text that emphasizes that Plains societies and cultures are continuing, living entities. Through a topical exploration, it provides a contemporary view of recent scholarship on the classic Horse Culture Period while also bringing readers up-to-date with historical and cultural developments of the 20th and 21st centuries. In addition, it contains wide and balanced coverage of the many different tribal groups, including Canadian and southern populations. Teaching & Learning Experience: Improve Critical Thinking - Indians of the Great Plains provides recent scholarship and up-to-date historical and cultural developments of the twentieth and twenty-first centuries to see the Plains societies and cultures as continuing, living entities — including charts showing tribal organization and kinship systems. Engage Students — Indians of the Great Plains features excerpts of Native poetry, songs, and ethnographic accounts, as well as Chapter Summaries and End-of-Chapter Review Questions.***

***The fourth edition of *World Religions in America* continues its lauded tradition of providing students with reliable and nuanced information about America's religious diversity, while also reflecting new developments and ideas. Each chapter was updated to reflect important changes and events, and current statistics and information. New features include a timeline of key events and people for each tradition, sidebars on major movements or controversies, personal stories from members of various faiths, a theme-based organization of***

subjects, more subheads, three new chapters exploring America's increasing religious diversity, and suggestions for further study.

*A Prehistory of North America* covers the ever-evolving understanding of the prehistory of North America, from its initial colonization, through the development of complex societies, and up to contact with Europeans. This book is the most up-to-date treatment of the prehistory of North America. In addition, it is organized by culture area in order to serve as a companion volume to "An Introduction to Native North America." It also includes an extensive bibliography to facilitate research by both students and professionals.

Examines the history of Latin America, from the time of the Mayas, Incas, and Aztecs to the present day. This second edition from our successful Basics series presents another chance to delve into this increasingly popular subject. Fully updated, *Archaeology: The Basics* has been revised to reflect growth in areas such as material culture, human evolution and the political use of the past. Lively and engaging, some of the key questions answered include: What are the basic concepts of archaeology? How and what do we know about people and objects from the past? What makes a good explanation in archaeology? How do we know where to look? From everyday examples to the more obscure, this is essential reading for all students, independent archaeologists and indeed all those who want to know more about archaeological thought, history and practice. A piece of broken pottery will never seem the same again. In this provocative work, Cheryl Claassen challenges long-standing notions about hunter-gatherer life in the southern Ohio Valley as it unfolded some 8,000 to 3,500 years ago. Focusing on freshwater shell mounds scattered along the Tennessee, Ohio, Green, and Harpeth rivers, Claassen draws on the latest archaeological research to offer penetrating new insights into the sacred world of Archaic peoples. Some of the most striking ideas are that there were no villages in the southern Ohio Valley during the Archaic period, that all of the trading and killing were for ritual purposes, and that body positioning in graves reflects cause of death primarily. Mid-twentieth-century assessments of the shell mounds saw them as the products of culturally simple societies that cared little about their dead and were concerned only with food. More recent interpretations, while attributing greater complexity to these peoples, have viewed the sites as mere villages and stressed such factors as population growth and climate change in analyzing the way these societies and their practices evolved. Claassen, however, makes a persuasive case that the sites were actually the settings for sacred rituals of burial and renewal and that their large shell accumulations are evidence of feasts associated with those ceremonies. She argues that the physical evidence—including the location of the sites, the largely undisturbed nature of the deposits, the high incidence of dog burials, the number of tools per body found at the sites, and the indications of human sacrifice and violent death—not only supports this view but reveals how ritual practices developed over time. The seemingly sudden demise of shellfish consumption, Claassen contends, was not due to overharvesting and environmental change; it ended, rather, because the sacred rituals changed. *Feasting with Shellfish in the Southern Ohio Valley* is a work bound to stir controversy and debate among scholars of the Archaic period. Just as surely it will encourage a new appreciation for the spiritual life of ancient peoples—how they thought about the cosmos and the mysterious forces that surrounded them. Cheryl Claassen is a professor of anthropology at Appalachian State University. She is the author or editor of six previous books on Native American prehistory, including *Whistling Women*, *Women in Prehistory*, and *Shells*.

*Climate Change and the Course of Global History* presents the first global study by a historian to fully integrate the earth-system approach of the new climate science with the material history of humanity. Part I argues that geological, environmental, and climatic history explain the pattern and pace of biological and human evolution. Part II explores the environmental circumstances of the rise of agriculture and the state in the Early and Mid-Holocene, and presents an analysis of human health from the Paleolithic through the rise of the state, including the Neolithic Demographic Transition. Part III introduces the problem of economic growth and examines the human condition in the Late Holocene from the Bronze Age through the Black Death, assessing the relationships among human technologies, climatic change, and epidemic disease. Part IV explores the move to modernity, stressing the emerging role of human economic and energy systems as earth-system agents in the Anthropocene. Supported by climatic, demographic, and economic data with forty-nine figures and tables custom-made for this book, *A Rough Journey* provides a pathbreaking model for historians of the environment, the world, and science, among many others.

This collection of essays examines the history of American archaeology in terms of some of the major figures and internal and external forces that shaped its development. The importance of using the vast array of unpublished materials in writing the history of archaeology is stressed, as is the need for examining more closely the important contributions of women, particularly in the period up to and immediately after World War II. Finally, the role of institutions in the development of American archaeology is also examined, both for their progressive and regressive attributes.

Most books dealing with North American Indigenous peoples are exhaustive in coverage. They provide in-depth discussion of various culture areas which, while valuable, sometimes means that the big picture context is lost. This book offers a corrective to that trend by providing a concise, thematic overview of the key issues facing Indigenous peoples in North America, from prehistory to the present. It integrates a culture area analysis within a thematic approach, covering archaeology, traditional lifeways, the colonial era, and contemporary Indigenous culture. Muckle also explores the history of the relationship between Indigenous peoples and anthropologists with rigor and honesty. The result is a remarkably comprehensive book that provides a strong grounding for understanding Indigenous cultures in North America.

This little book is intended as a general commentary and explanation of the more important phases of the ancient life and arts of the Indians of Mexico and Central America, and especially of their history. The substance of it is drawn from many sources, for the anthropologist must mould together and harmonize the gross results of several sciences. Archæology, ethnology, somatology, and linguistics all make their special contributions and we are only on the threshold of our subject. In the Mexican and Central American field we find the accumulated writings that result from four hundred years of European contact with the Indians and in addition a mass of native documents and monumental inscriptions expressed in several hieroglyphic systems. The general method of this book will be to take up in order the recognized "horizons" of pre-Columbian history, beginning with the earliest of which we have knowledge. In relation to each horizon we will examine the records and discuss the principal developments in arts, beliefs, and social structures. The introductory chapter is designed to put before the reader such facts as may be necessary for a ready understanding of the discussions and explanations that will follow. The Mexican Hall of the American Museum of Natural History furnishes illustrations of most of the facts given herewith. This Hall contains both originals and casts brought together by various expeditions of the Museum and of other scientific institutions. The principal patrons of science 6 whose names should be mentioned in connection with the upbuilding of these collections are: Willard Brown, Austin Corbin, R. P. Doremus, Anson W. Hard, Archer M. Huntington, Morris K. Jesup, James H. Jones, Minor C. Keith, the Duke of Loubat, William Mack, Henry Marquand, Doctor William Pepper, A. D. Straus, I. Mcl. Strong, Cornelius Vanderbilt, Henry Villard, William C. Whitney. But thanks are also due to innumerable persons who have contributed single specimens and small collections as well as those who have placed information at the disposal of the scientific staff. The principal collectors have been: George Byron Gordon, Aleš Hrdlička, Carl Lumholtz, Francis C. Nicholas, Marshall H. Saville, Eduard Seler, Herbert J. Spinden, and John L. Stephens.

Sixty years after their discovery, this is the first anthropological synthesis of the ancient Arctic foragers of Point Hope, Alaska.

Transatlantic literary studies have provided important new perspectives on North American, British and Irish literature. They have led to a revision of literary history and the idea of a national literature. They have changed the perception of the Anglo-American literary market and its many processes of transatlantic production, distribution, reception and criticism. Rather than dwelling on comparisons or engaging with the notion of 'influence,' transatlantic literary studies seek to understand North American, British and Irish literature as linked with each other by virtue of multi-layered historical and cultural ties and pay special attention to the many refractions and mutual interferences that have characterized these traditions since colonial times. This handbook brings together articles that summarize some of the crucial transatlantic concepts, debates and topics. The contributions contained in this volume examine periods in literary and cultural history, literary movements, individual authors as well as genres from a transatlantic perspective, combining theoretical insight with textual analysis.
